

The Blue Criminal Report of offences against Rutte et al.

A number of organisations comprising medics questioned the emergence of the Covid-19 disease declared by the OMT on 28 February 2020. A lot of facts turned out to be wrong. An initial investigation quickly revealed, that Covid-19 does not appear to be a disease but a global well-prepared project called "**Covid-19: The Great Reset**".

On this basis, in the fourth quarter of 2020, an investigative team consisting of several specialists was commissioned to draw up a substantiated criminal charge sheet against some prime suspects in the Netherlands, being Rutte et al. All the facts known at the time were checked against the truth.

The crimes against humanity committed in person by the prime suspects in the context of the Covid-19: The Great Reset project violate international treaty absolute fundamental rights, among others. The prime suspects are personally charged with these serious crimes against humanity.

It is time for the world's people to assert their God-given natural rights and their fundamental (absolute) rights.

The crimes against humanity committed by the prime suspects are of such a serious nature that every person - in particular every public servant in the Netherlands - who has taken cognisance of these crimes committed has a criminal duty to file charges against the prime suspects without delay and ensure that these serious crimes against humanity are stopped immediately.

In February 2021, the initiating organisations commissioned a printing company to bind the criminal charges against Rutte et al. The Blue Book for Criminal Report against Rutte c.s. with a print run of 6,000 was produced as a result. During 2021, all 6,000 Blue Books were distributed.
